

## Electric Series

- ✕ Lightweight & Portable
- ✕ Up to 300 CFM
- ✕ Operates on a Standard 120-volt 20-amp Outlet
- ✕ 99.9% Filter Efficiency to .5 Microns
- ✕ Oversized Low-Loading Filters - up to 28 sq. ft.
- ✕ Extended Duty Cycle
- ✕ Low Filter Velocity
- ✕ Composite Housing - Impact & Corrosion Resistant
- ✕ Individually Fan-Cooled Bypass Motors
- ✕ Foot-Lever Activated 9-Gallon Dustpan
- ✕ Lifetime Housing Warranty  
3-Year Filter Warranty  
1-year Motor Warranty

# Xtract<sup>®</sup> MAX

## Portable Electric Vacuums

The NEW XtractMAX<sup>®</sup> electric series of portable intermittent duty vacuums are small in size but huge in performance! The oversized, high-efficiency filters and lightweight easy maneuverability make XtractMAX<sup>®</sup> the ideal solution for even the finest dry material cleanup — powder coating, carbon black, talc, concrete dust, lead and asbestos.

Up to 28 sq. ft. Filter Media

For added storage capacity or liquid cleanup, simply connect the optional Pre-Separator System.

The massive low-loading filter allows large quantities of materials to be picked up *without* loss of suction — with an incredible 3 to 5 year average filter life.

The convenient foot-lever access makes for hassle-free emptying of the huge 9-gallon dustpan.

The compression cast composite construction of XtractMAX<sup>®</sup> is incredibly rugged. It will not dent or rust, is abrasion resistant and chemically neutral.

Powerful, rugged, portable, efficient and low-maintenance, XtractMAX<sup>®</sup> will handle your toughest vacuum and dust collection needs.

## Pre-Separator

Optional Pre-Separator System attaches directly to XtractMAX<sup>®</sup> for additional material storage and liquid cleanup.

More storage means less down time and longer filter life.

Vacuum Equalizer Kit allows poly drum liner for easy debris removal.

- 20/30/55 Gallon Options
- No Filters Required
- Removes 90% of dry dust
- Removes 100% of liquids

Hoses and Attachments for any Application
